

**Some people think that museums should be enjoyable places to entertain people, while others believe that the purpose of museum is to educate. Discuss both views and give your own opinion.**

There is the consensus in the part of people that they going to museums with entertain functional, however, other believe that museums is beneficial way to educating to everyone. This essay will examine both views and explain why I lean forward the latter.

On the one hand, I can validate the argument: visiting museum to entertain being correctly. Museum is the tourist attraction, exhibit the artworks to serve people want to look at. Most of visitors usually priority turn to its not only hearing contents in real-time instead of studying, but also using this valuable time for family or friends. Besides, to enhance serve's quality, managers can set up interactive activities which satisfy customer's demand. In the constrast, if mangers do not implement these way in travelling program, visitor would bored due to without seeking the interesting, avoid to this. Futhermore, the short-term trip to museums have not help people well aware about artifacts value which showcased.

On the other hand, I side with those who believe that museums should be concertrate on educating purpose more than others for residents. It is undeniable that, museum is the address where providing artifact, object in real-life which anyone can look at. Thanks to an introducing of tour guide – everyone can enhance their knowlege about science, art and others subject, improving learning program as well as an real-life trip of students. From historical perspective, this is useful method to help all individuals, specially youngers perceive the historical lesson by reality approaching way. These value will have been unregarded and without existing position currently if museums only apply the entertaining form and send this to visitors, so implementing education purpose should be deployed in the wide range of museums.

In conclusion, although existing many distintive viewpoint about function of museums, but I believe that museums manager will seek the solution to balance an educating and entertaining purpose and apply its to useful.
