

Mobile phones should be banned in public places such as libraries and shops and on public transport. To what extent do you agree or disagree?

Some people argue that mobile phone need to be blocked in public locations, including shops, library as well as public transport. While I accept that this idea will bring beneficial about people , I believe that it is not the best way.

On the one hand, I side with those who want to banning mobile phone in public with many reason. Using phone have the eyesore to some individuals as well as preserving in public space. In library, where require quite workspace, higher volume of phone caused disrespect and discomfort to other, distracting in work. This is particularity in the case for public vehicle, namely bus. This is mean that not only influencing on other people, but also it makes increasing likelihood that lost of phone, attracted thieves. Therefore, applying smartphone prohibiton will be effective measures for residents.

On the other hand, this argument is unbeneficial measures due to mobile phone which is essential controller of people in the period of technological development. In fact, using phone outside to communicate, call video with friends or family member distance are fundamentally trend. Moreover, it completive support people in specially situation, such as emergency, firefighter. To illustrates, mobile phone will be adjacent supporter help owner look for content easier than in paper-books on libraries. No one stupid enough to create banning in virtue of it would incidentlly devise irksome and angriness in public general. This can explain that citizens feel their freedom is compromised, no solving working with comfortable.

In conclusion, while there are many benefits regarding without allowing smartphone in public, I still believe that it is more disadvantageous.
