

## Map ngày 11/7/2024

The maps below show the future plan about the Biology School in particular university

The map illustrates some changes in Biology school in university at the present and afterward. Overall, the school was some significant change during the mentioned period. The most noticeable is that the forests in the bottom-left corner will be cut down and replaced by new car park while the same event will appear in the northern area.

As can be seen from the map, indoor sport hall nearby the northern forest will not change this position and function, whilst the the function of drama center adjacent central lib will be transported into are of those who playing music. Besides, the central lib and the half-circle road will remain afterward. Furthermore, a part of forest will be destroyed and the buidling of new lab and office will be witnessed at the same time.

Turning to the other features, the university will make the expansion for IT centre's area at the bottom-right corner in the map, while the coffe store also remain function. Moreover, the dividing into two minimal room will appear in the two: teaching bulding and lecture room, and a both new room will be connected via path. Finally, the forest oppose with teaching building will be removed and used for building a car park to serve staffs.
