

The animal species are becoming extinct due to human activities on land and in the sea. What are the reasons and solutions?

In this day and age, many activity of human on the both of ocean and continent driven animals on the verge of the extinction. This essay will shed light on the cause of above actual and propose viable solutions.

There are some reasons associated with this phenomenon. The first reason is that the animal areas are gradually narrowed and desvastrated. With an increasing in residential zones and inflastructure, animals will not own these private space for serve many activity by virtue of the cutting down in forest. As a consequences, animals in a both of sea and land must avoid “the human invasion”, lost of basically food source or direct contact with worse enviromental condition. Another reason is that the hunting animals of badly individuals or organization. It is hunting species of rare animals, for example Seneca White Deer, California dolphins. Individuals (criminals) actually participate in this activities to address their main purpose: money as well as using animal in evil intention. Even so, a both of reason leads to same consequence: the supply in the human livelihood is threatened, creating climate changes.

To solving this, the crucial viewpoint must start from a both of government and residents. As the matter of fact that, nation’s leaders can apply some environmetally policies to individuals for improving perceive in protecting biological system, maybe limit destroying forest, trees. In the glance of some human, they can operate useful project and programme for restore plants, forest reproduction in the wild land. Additionally, the agency need prevent crime from cutting forest or hunting animals, devise highest punishment. Simililarly, anyone need contain knowledge with environment, without involving in destructive animals behaviours.

In conclusion, environmental poluttion and hunting animals are important cause for explain to this trend. Protecting animals and environment generally are common responsible of everyone, without execption. I believe that solving this problem make a beneficial to the people if project well.
